Technical Skills

Front-end Technology : HTML5, CSS3, Javascript,Ajax,React

Back-end Technology : NodeJS, ExpressJS

Database : mySQL

IDE : Visual Studio Code

Deployment : Github, firebase, streamlit

Other : C , Python , Java, DSA , DAA

Projects

Hospital Management System

Tech stack : HTML, CSS ,JS , ReactJS

Description: I developed a web-based Hospital Management System (HMS) to streamline healthcare operations and improve administrative efficiency. The system includes essential features such as patient registration, appointment scheduling, medical records management, and billing automation. Designed with a responsive and user-friendly interface, it ensures seamless access for patients, doctors, and administrators. Secure, role-based access controls safeguard sensitive data and maintain privacy. Additionally, the system generates detailed reports to support effective resource management and decision-making. This web application enhances workflow efficiency and elevates the quality of patient care in healthcare facilities.
